BUSINESS OPPORTUNITIES

SIT BACK AND RELAX, FOCUS ON YOUR ADDED VALUE TASKS AND LET US AUTOMATE YOUR BUSINESS...

PARTNERING WITH YOU

We are focused on creating partners, not clients. We take ownership in our projects and deliver to perfectionism. Added value resides is in the solution to your problem. We listen carefully, understand your concerns, research thoroughly, strategize and implement quickly with due diligence and minimal supervision.

PROJECT TECHNOLOGY

We are advocates of the Microsoft Power Platform and specialize in PowerApps, Power Automate and Power BI. We are able to integrate multiple Microsoft systems in a single app. These include, Outlook, Planner, Teams, Tasks, Stream, Forms, Notifications, Azure Active Directory, AI Builder and many more.

R&D

Within the Power Platform, we are focused on continuous research into hundreds of Power Connectors in order to identify and adopt the most efficient workflows. This includes Microsoft connectors, third party solutions and Artificial Intelligence AI such as Ocular Text Recognition OCR, barcode, QR code scanning and invoice scanning.

OUR POWER APPS PORTFOLIO

01 **BUILDING VISITOR MANAGEMENT APP**
Manage your building guest list with absolute peace of mind.

02 **DESK BOOKING APP**
This app provides an agile approach to manage hotdesking.

03 **INVENTORY MANAGEMENT APP**
Barcode scanning app that enables stock management.

04 **INVOICE SCANNING AND ARCHIVING APP**
App uses AI text recognition to populate accounting spreadsheets and archive digital copies of invoices and receipts.

05 **OTHER APPS**
A variety of other prestigious apps.

**TRUST US,
WE THINK LEAN...**

PARABIM

01 - Bldg. Visitor Management App

In compliance with GDPR, buildings are no more allowed to keep paper-based registers on front desks as they impose a serious security breach to personal details of people.
This app provides a compliant digital solution whereby any expected guest is logged into the app upfront and is assigned to a host employee. Once the visitor arrives at the front desk, the app integrates several means to inform the host of the arrival of their guest. These include, phone, sms, push notifications, emails and sending MS Teams adaptive cards. An ID scanner can be integrated in this app with ease as we already have the experience implementing similar projects such as our Invoice Scanning App. This app includes an archive list of past-dated visitors.

02 - Desk Booking App

Following EU COVID-19 Guidelines for social distancing at work, the displayed app provides an agile desk booking approach integrating Office365, Outlook, OneDrive for Business & SharePoint.

Once a desk is booked an email will be sent out to the user confirming their desk reservation & providing an email-integrated cancellation button. The app integrates a bar-code scanning function that verifies the desk reservation upon employee arrival and sends a notification to facility management to clean the desk afterwards.

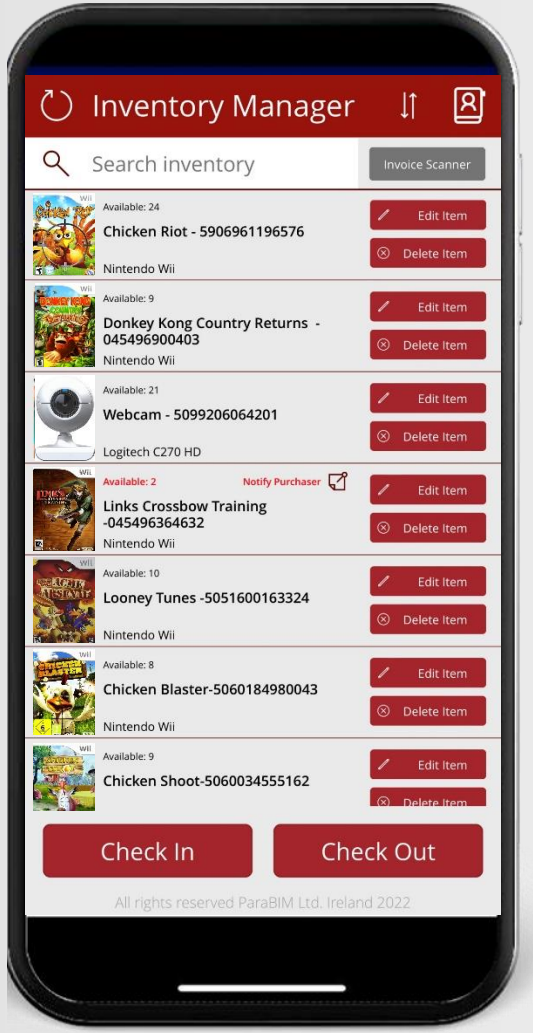
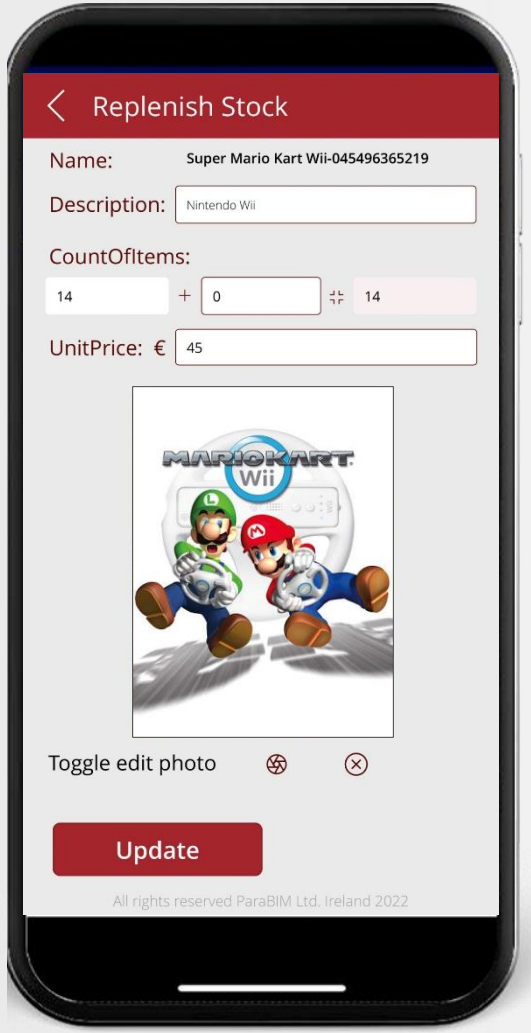
03 - Inventory Management App





WITH BARCODE SCANNING CAPABILITY FROM YOUR PHONE CAMERA

The client for this is a small store for pre-owned Nintendo games. The App enables stock management via Bar-code scanning to add, remove, edit any item and get automated lean notifications when the client is low in stock. The app utilises an integrated invoice scanner to keep a copy of all invoices and other important documents via Power Apps AI Builder and its Optical Character Recognition (Auto-text & Handwriting converter).

5.2 - Parking Reservation App

Our client requested an app to organise their staff parking based on a first-come-first-served approach. We provided a fully comprehensive solution that enables reservations and cancellations using Outlook with a back-end for admin overrides.

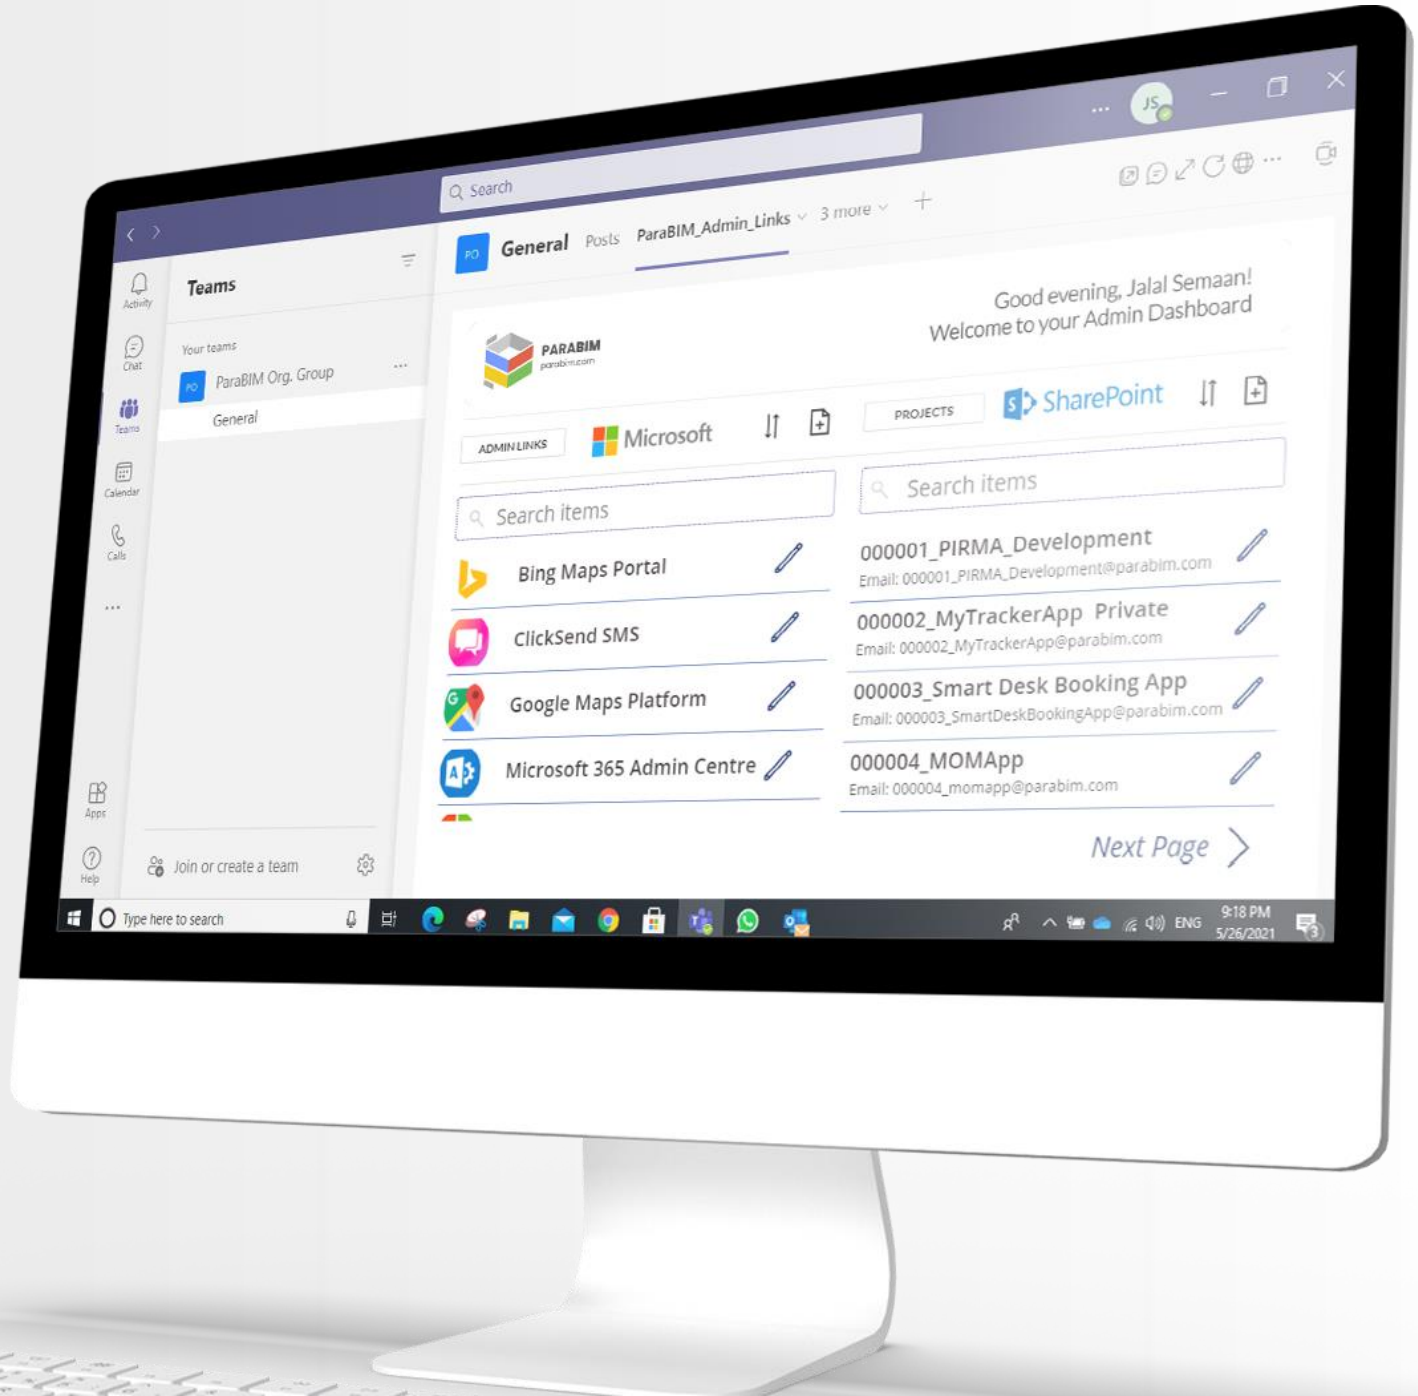
05 - Other Apps

5.3 - Projects Dashboard App

The purpose of this app is to keep a record of all the quick links and project links that would be shared with all project members via a Microsoft Teams Channel. You can quickly add, edit or remove resource-links, or share resource links with project members via Teams as well.



PARABIM

05 - Other Apps

5.4 - Contactless Check-In App

This app provides a contactless employee check-in mechanism, integrating Office 365, Outlook, Bing Maps, OneDrive for Business and SharePoint. Check-in from anywhere, whether you have just arrived at your client's or if you are working from home (anywhere around the world).

The app was partially intended to be used by employees in the infrastructural engineering sector who may need to travel to insecure-high risk regions in Africa. Therefore an ‘SOS’ button and camera were integrated so that ‘Last-seen’ photos and geolocation may be logged in quickly with auto ‘SOS’ notifications sent to head office.

5.5 - Learning Management

Never miss a training or a webinar again!

This app is integrated with Stream, Outlook, SharePoint and Forms, allowing any employee to browse the training catalogue, play the recording, download the datasets, submit their feedback form and communicate with the trainer via email.
